

Olipad 100 GPS

PRODUCT

The OliPad 100 is a new 10" touch tablet from Olivetti for people who want a versatile portable device to manage digital content.

The new OliPad 100 runs the Android operating system and offer a series of applications for web browsing, social networking and use of media and publishing content.

Multimedia functions and connectivity on the move ensure the device meets every type of user need.

Practical and intuitive, the OliPad 100 is the perfect tablet for work and for leisure.

STRENGTHS

- **SYSTEM FLEXIBILITY:** thanks to the Android platform and the USB/ SD CARD ports, the OliPad 100 interfaces simultaneously with any device, guaranteeing hardware expandability and software integration.
 - **MAXIMUM CONNECTIVITY ON THE MOVE:** the 3G (HSPA), Wi-Fi and Bluetooth modules, provide users with network connectivity, wherever they are. The optional docking station with HDMI ports enables films to be viewed in Full HD with a direct link to a television set.
 - **MULTIMEDIA and OPERATING VERSATILITY:** the OliPad 100 plays music, images and video content in Full HD. Its eReading software allows digital books to be read directly on the 10" display.
 - **ULTRASLIM DESIGN:** the tablet is just 13.9 mm thick and weighs just 780g.
- **SPEED:** the Cortex A9 NVIDIA® dual core processor supports advanced graphical and game capabilities, enhanced by Flash Hardware acceleration.
 - **INTERFACE:** simple and intuitive, to optimise usability of all the tablet functions.

Olipad 100 GPS for BUSINESS

The **Application Warehouse**

initiative is open to Olivetti partners as well as to independent developer communities, who can add to the application catalogue with solutions for the various platforms.

The hardware and software can be configured to suit specific corporate needs and the tablet can be enhanced with vertical applications.

Olivetti's **Application Warehouse** is a store of configurable applications that can be tailored to users' changing needs. Solutions are managed at local level on the device or delivered from the cloud in "software-as-a-service" mode to guarantee on-going updates and keep IT costs down.

Examples of applications available to date include:

- **Enterprise Social Network**

For team working and content sharing inside the workplace and externally (suppliers and third parties)

- **Management of Signature Workflow**

For any type of company document, using a digital signature function

- **Sales Force Management :**

An application for order management and sales staff reporting, which supports the introduction of new files, retrieval of existing files, registration of orders or contracts, display of sales offers or reports

- **Digital Catalogues**

This is ideal for the preparation of the point of sale dedicated to, for example, fashion industry networks
