COLOUR DIGITAL MULTI-FUNCTIONAL SYSTEMS

## THE PINNACLE OF OFFICE EFFICIENCY

Ideal for high volume productivity and excellent colour quality in creative and security conscious workplaces.

**FINISHER UNIT** for booklet functionality

**EASY ACCESS** for the replacement of consumables

**JOB SEPARATOR** for printed fax documents

### PAPER MANAGEMENT AND FINISHING

The Olivetti d-Color MF220, d-Color MF280 and d-Color MF360 support a wide range of paper formats including standard formats up to A3 as well as personalised formats. The paper trays offer a standard capacity of 1,150 sheets, expandable to 3,650 sheets, and handle weights up to 256 g/m<sup>2</sup>; the bypass supports weights up to 271 g/m<sup>2</sup> and special formats including labels, transparencies and envelopes. Banners can be printed to lengths of 1.2 metres through the bypass.

Three types of finisher unit are available for system customising of in-house publishing requirements: a modular floor-standing unit, an integrated stapler finisher and a job sorter.

### ENERGY SAVINGS AND ENVIRONMENT

The polymerised toner delivers superior print quality in all documents, due to its small uniform particles. At the same time, the polymerisation process enables toner fixing at lower temperatures that means minimising warm-up time while reducing power consumption. In compliance with environmental regulations, the design of these systems allows easy separation of materials (including the toner bottle) for fast, convenient recycling.

## MAIN CHARACTERISTICS

### SECURITY

The Olivetti d-Color MF220, d-Color MF280 and d-Color MF360 are the new colour digital multifunctional systems that pay special attention to security.

**Authentication for a variety of profiles** means users can access the internet with maximum confidentiality guaranteed.

The **Copy Guard function** prevents copies being made of documents with a specific security pattern. Confidential documents can be protected with the **secure printing function**, which enables printing only after the document password has been keyed in on the operator panel. Documents will be printed automatically only when the system has authenticated the user.

A wide range of security functions are also provided to guarantee confidentiality on fax transmission.

### SCANNER AND FAX

Equipped with a high-performance scanner, the new multifunction systems make it easy to distribute and share information.

With a speed of 70 opm, they provide high-speed scan-to email, scan-to-FTP, scan-to-SMB, scan-to-Box (user mailboxes). Scan formats include PDF and compact PDF, XPS and compact XPS, TIFF and JPEG.

The models feature scanning to a USB medium, for document acquisition without a PC. Scanning in OCR mode supports faster text searches in PDF documents.

Digital and analogue fax capabilities allow users to manage fax messages directly from their PC, without having to print documents.
